

CRE intelligence

built for today.

rDCF™ is rSquared™'s innovative new SaaS software for creating valuation and underwriting models, delivering quick and accurate results.

rDCF offers Common Sense Technology

Organization

Virtual folders, detailed workbooks, intuitive workflow and sophisticated building management.

Navigation

Hotkeys and carousel-style functions facilitate simple data input on our SaaS platform.

Experience

Flat learning curve requiring minimal training, utilizing drag and drop technology and easy sharing for collaboration.

Advanced Intelligence

Unsurpassed import/export capabilities, robust and auditable reports and exposed formulas for calculation transparency.

Built for
Accuracy.
Built for
Speed.
Built for
Our Industry.

Welcome to a new era in intelligent valuation software, built for you by

rSquared™

rDCFTM By The Numbers

rDCF was designed and built for CRE pros by CRE pros.

200+

rDCF team's combined years
of CRE experience

2

Hours to learn rDCF

400,000

Hours our team has spent
modeling commercial buildings

100s

Of key CRE metrics

85%

Less time to create presentations*

0

On-premises hardware
and database costs

As the numbers prove, rDCF is completely transforming the way CRE valuation is done. Once you see rDCF's advanced features, streamlined design and intuitive user interface yourself, all other CRE valuation software solutions will seem obsolete.
